the New York Imbure says. The already become the beet sugar industry it was not to be expected that the early est expe meets in sugar beet production in this hate would yield results alto ge her as sat sfactory as have been real ed after many vests of expenence and it we treation by the producers to some other countries. The the results already attained are enough to indicate. what s o come the new sugar factory a. Rome has closed its season after forty two days of wo k in which it has man ofectured !"O tous of sugar averaging high grade a parity. If supplied with beets enough to run the whole year, this mag e fac ory could apparently turn out about eight times as much which would be not more than a thousand acres would produce. According to the experiments onducted by the State authorities, the beets averaged per 100 pounds about twelve pourds of sugar and are as rich twelve pour is of sugar and are as from in sugar as the beets produced anywhere in the a rid. As the self farmers, contributing the r products, this year averaged from twelve to diffeen ions of beets. to the acre, the indu try has yielded them 1 om \$50 to \$5 an acre

It is not necessary to say that farmers to this and other States do no. average anything like such returns from other crops Out of the price oblined for the beets the farmer has to pay for the labor. of cult ration and for the use of the land, and it is believed that the coat of raising pose But again it is not necessary to walt until future possibilities can be reached, for the actual profit this year is enough to induce multitudes of farmers.

CHOICE CUT FLOWERS.

Wholesale and retail The enough to induce multitudes of farmers to prefer best culture to other employment of their land and labor. The sugar imported into the country, even at the rate real z d this year by New York farmers at their first experiment, could be raised by little over a militon acres of land, and would return to, the farmers about \$60 000 000, besides a profit to manufacturers, for, even at present low prices, more than \$80,000,000 a year is being paid to other countries for the imported sugar consumed in the United

If this large amount were taken from the amount annually due to other countrier, the balance payable to the United States in gold would be so far increased that no fear would be entertained of a drain of the precious metal. The soundness of the monetary system would then be beyond the reach of the possible changes in foreign commerce, and could tence or wilful dishencety in government. The value of hest ought alone, if produced in sofficient quantity to supply most. Says No Would Rather Farfeit His Crown Physician Thinks the Atlack Will Ultimate ly Rosult in Doath.

> Canton, O., Dec. 2 - Mrs. Nancy Allison McKinley, mother of the President was stricken with paralysis this morning question of a short time. The paralys t present is of a mild form, chiefly af feeting her vocal chords, but on accoun of her extreme age, nearly 89 years, Dr of her extreme age, avail, to some Phillips, the attending physician, can give but little hope to the family. Mr. Abner McKinley, who is mediately communicated with the President by telephone. The latter asked if he should start at once, but Mr. Abner McKinley advised him to wait a further report from the physicians. The physician's statement to the family was that there was little doubt that the attack would ultimately result in death, but the end, he said, might be in a short time or it might be in a week, or at a more dis-

end, he said, might be in a short time or it might be in a week, or at a more distant period.

Mother McKinley for some time has not been in real good health, having suffered from a mild form of grip with which she has been afflicted, but she was able to be up and about the house. On Wednesday, she seemed to have meterially improved and her bright and cheerful humor was especially noted by the members of the household, Mr. Abner McKinley remarking that he had not seen her in such appropriate as usual Wednesday night, occupying a room adjoining that of her daughter, Helen. About the usual rising hour this morning, Mother McKinley walked to Miss Helen McKinley's room and awakened her. The latter addressed her mother and receiving no reply, surmised that something was wrong. Steinmedlately summoned the household and a physician.

Except in the failure of her word or gank. Mrs. McKinley shows but life widence of the paralysis. She is in full nossession of her mental faculties, recognizing all of the family and others who see her and taking an interest in, whatever transpires. A letter was received from the President this morning and was read to her by Miss Helen who inquired if sign understood the letter. To this Mother McKinley nodded her assent. Her physical powers up to noon were but little affected by the paralysis. She seems able to handle herself nimest as well as usual.
